

Third International conference on the **FUNCTIONAL ARCHITECTURE OF MEMORY** May 25 to 27, 2016

The FAM conference aims at bringing new insights on today's major controversies in recognition memory, and bridging human and animal memory function.

World leading experts on the Medial Temporal Lobe will discuss findings obtained with complementary approaches (behavioral, imaging, functional neuroanatomy and electrophysiology).

Go to <http://www.ruhr-uni-bochum.de/philosophy/famconference> for preliminary schedule, further description of the event and registration.
